

Steel Barricades

These Barricades are built from heavy gauge steel and are hot-dipped galvanized inside and out for long-term weather resistance. Frames are made from 1.5" OD 16 gauge steel tubing, while uprights are made from 1/2" OD 16 gauge steel tubing. Uprights are fully inserted into the frame before welding, providing extraordinary strength. Choose from two base systems: a bridge base for uneven surfaces such as grass and a flat base for smooth surfaces such as tarmac and where pedestrian traffic demands the minimum trip hazard. The barricades interlock using the industry standard hook and half-loop fastening system.

SPECIFICATIONS

Height: 43"
Length: 8' 4"
Weight: 44lbs (Bridge & Flat Feet)
Standard Colors: Galvanized, Black, Orange
Custom Colors: 200+ custom colors available

SHIPPING DIMENSIONS

Max Pallet Loading: Galvanized 50, Black/Orange 40
Dimensions: W41" x L 96" x H72" (Qty 50)
Empty Pallet Weight: 125lbs

CHOICE OF TWO BASE STYLES
