RollerPro 300

FEWER BARRIERS AND EASY MOVEMENT

The RollerPro 300 is designed for fast, easy setup of large queue systems. This product's 16' / 4.9m belt halves the number of barriers needed with the industry standard 7.5' / 2.3m belt. Set up is made easy by moving the RollerPro 300 using the discrete 4.5" / 115mm roller built into the base, simply tilt onto the roller and push using the post head. The belt mechanism is housed inside the 3" / 75mm diameter post giving the RollerPro 300 a sleek, elegant look and despite the long span the belt won't sag. Made from heavy duty steel and with a solid cast iron base the RollerPro 300 will withstand the wear and tear of high traffic areas.

Model ROL300PS

Break for slow, safe belt retraction
